Product Management Portfolio
By Alisha

What is this portfolio about?

This portfolio showcases how I've led global product launches, built machine-led SaaS solutions, and driven 90%+ client retention over the years. I created it to go beyond the resume—giving you a clear view of my strategic thinking, execution style, and measurable impact. If you're hiring for someone who blends innovation with accountability, you're in the right place.

Hello There!

Welcome to my Product Management portfolio—where strategy meets execution.

With over 5 years of experience delivering SaaS and Gen-AI solutions across global insurance markets, I've led cross-functional teams, launched machine-led platforms, and driven 90%+ client retention through data-driven innovation. This portfolio is designed to give you a clear lens into how I build products that scale, solve real problems, and deliver measurable impact.

My name is Alisha!

I am currently a Product Manager for a Machine-led SaaS solution for Monitoring pricing models.

Case Study

THIS CASE STUDY OUTLINES THE JOURNEY FROM IDEATION TO RELEASE OF ALERTS FEATURE AS PART OF AUTOMATION SOLUTION WHICH BROUGHT BUSINESS FROM NEW CLIENTS.

Company Mission meets User Problem

- A visual pulse of automation – clean, consistent, and insight-driven.

- Manual monitoring takes time, frustrates users, and blocks high-value work.

By Head of InsurTech

" By automating the heavy lifting as part of our Automated solution, we help our clients make strategic business decisions. Providing ability to improve efficiency for our clients and achieving 90% retention rate is a success for us."

By Head of Department

"I am fed-up staring at the dashboards and analysing the results manually. I just want a nudge when the results slip—save the hassle, keep the sanity. "

Product Strategy

Product Vision

- Empower executives to monitor business and take actions for their business model.

Market Opportunity

- Be the first to provide the solution for automated alerts

Strategic Pillars

- Data-Driven Roadmap
- Customer Centric Design
- Agile Framework

Success Metric

- Bring 5 sales in first 6 months of feature launch
- User-usability score of 5 and above

User Research Example

Questions

- How frequently are you monitoring results?
- What are the must haves for you from below list?
  - Alerts - High/Med/Low
  - Alerts trigger for all metrics – Create/Edit/Delete
  - Previous alerts and associated actions
  - Export historical alerts and actions
- Who else in your organization will benefit from this feature?

Summary

- 10 participants
- Roles to be benefited by the feature
  - Executives
  - Junior Analysts
  - Data Scientist
- Must Have and Nice to have decisions made and documented in PRD. Link to PRD provided.

Conclusion

- 65% participants monitor their results as frequent as daily.
- Create/Edit/Delete is the key functionality needed.
- Setting severity for each alert is crucial.
- Export of historical alerts is not needed at this stage.

Next Steps:

- Finalise which recommendations to implement.
- Iterate on Design beyond MVJ.

User Personas

Marco Ferreira (Chief Operating Officer)

About

- Marco has 20+ years of experience in operational management.

Goals

- Monitor where the resources are invested.
- Increase efficiency across the department

Pain Points

- Lack of availability of resources
- Oversight of real-time issues is not possible

Anjali Dixit (Analyst)

About

- Anjali has 3+ years of experience of working with Dashboards and complex data.

Goals

- Estimate impact on business
- Work on multiple projects efficiently

Pain Points

- Meeting deadlines becomes difficult due to manual process

These personas are to depict the strategic thinking and user validation. Real life Personas are more details oriented.

Prioritisation Research

Priority	Client 1 UK	Client 2 UK	Client 3 EU	Consultant 1 – UK	Consultant 2 - NA	Consultant 3 - APAC	Consultant 4 - EU
P1	Alerts	Alerts	Alerts	Alerts	FeatureC	Alerts	Alerts
P2	FeatureB	FeatureB	FeatureC	FeatureC	Alerts	FeatureC	FeatureB
P3	FeatureC	FeatureC	FeatureB	FeatureB	FeatureB	FeatureB	FeatureC

Research Conclusion:
"Alerts" has been the highest priority feature for 2 clients and 3 consultants with majority target market being United Kingdom (UK).

* This data is only to show the research and decision-making strategy.

Product Requirement Document

Epic

Epic Summary	
Name	Alerts
Executive Summary	Alerts provide users with ability to monitor insights automatically.
Industry	B2B Segments
Role	Actuaries, Actuarial analysts, Executives, Directors in Pricing and Underwriting Insurance Industry.

Scope

In Scope – Phase 1 Delivery
Users can define, edit, delete the alerts.
Alerts are triggered when criterion is met for ongoing monitoring
There are two types of Alerts users can define o Quantitative o Qualitative
There are three types of severity defined o High o Medium o Low

In Scope - Phase 2 Delivery	
Security Breach	Role-based Permission
Scalability Bottlenecks	Architecture Design to adhere with scaling
Alert Fatigue	Allow users to bundle alerts in categories
Data Privacy	Adhere with GDPR guidance

Product Requirement Document

Functional Requirements

Requirement	Description
Trigger Logic	Alerts must be triggered based on user-defined configuration
Configuration	User can define alerts for both Quantitative and Qualitative alerts and set severity levels
Alert History	All past alerts for past results must be retained
Multi-tenant Support	Alerts must respect user roles and permissions

Non-Functional Requirements

Requirement	Description
Performance	Alerts must be trigger and appear within 5 seconds of the event
Scalability	System must support 100 alerts per minute
Usability	Alerts must be clear and actionable
Maintainability	Alert editing must be easily updated via User Interface

Risks and Mitigations

Risk	Mitigation
Security Breach	Role-based Permission
Scalability Bottlenecks	Architecture Design to adhere with scaling
Alert Fatigue	Allow users to bundle alerts in categories
Data Privacy	Adhere with GDPR guidance

User Story Description

User Story ID	User Story Title	Description	Story Points	Acceptance Criterion	Dependent/ Related
T001	[Backend] Alert is triggered for each quantitative and qualitative metrics	**As a user**, **I woul**d like the alerts to trigger for all qualitative and quantitative alerts defined, **so that** I only monitor when alert criterion is met.	8	**Given** a user has created an Alert respective to each qualitative/quantitative metrics, **when** user publishes that alert, **then** when the criterion is met, alert must be triggered.	No predecessor
		As a user, **I woul**d like to trigger an alert with updated criterion once edited, **so that** I only monitor when new alert criterion is met.		**Given** a user has edited configuration of an existing alert, **when** the updated alerts is re-published, **then** the alert must be triggered when new criterion is met.	
		As a user, I would like to not trigger an alert when I delete it, so that I do not get any false alerts.		**Given** a user has deleted an existing alert, **when** the alert does not exist in existing alerts list, **then** the alert must not be triggered for deleted criterion.	

Launch or Release Cycle

Few Words about me from my colleagues

The Recommendations section on my LinkedIn profile highlights the value I've delivered to clients and teams—I'd be glad if you took a look.

Andy Bridges
Product Director

In addition to her exceptional product skills - working closely with clients to truly understand their problems, defining the requirements that they really need (instead of just taking the ones they tell you about), and translating them into something that engineers can understand and build - Alisha has always been a wonderful team player with a real eye for delivery.

Chetan Shah
Senior Associate

Her ability to translate complex requirements into actionable tasks streamlined development process, resulting in successful product launches. Her exceptional communication skills and strategic mindset ensured alignment between stakeholders and development teams, driving product success.

Raj Senanyake
Delivery Director

Alisha has worked with multiple products both in an SME capacity then being promoted to Product Owner and she has taken on the challenge, constantly learnt and excelled. She is not only great with her subject matter expertise but also fantastic with people, supporting her teams and always enthusiastically taking on Inclusion and Diversity initiatives.

Thank you!
